

## CARDIO PRODUCTS

### Treadmill

*What can lead your passion? A treadmill that improves physical balance as well as physical energy makes your body and soul stronger through advanced performance and strong durability.*

#### **STEX 25T Series Treadmill: Engineered to perfection**

- Built to withstand the ravages of time and continuous use.
- Easy operation function and interface for users.
- Sturdy design
- High level performance
- Affordable and good return of investment

### Elliptical

*A soft exercise experience is delivered by an ergonomic powering mechanism, which was first patented in Korea. The technological excellence minimizes the impact on joints and doubles the effects of whole body exercise. S25 Elliptical Series helps you realize your dream.*

#### **STEX S25 Elliptical Series:**

STEX S25E Elliptical series is designed with superior biomechanics to ensure the user experiences of

- smooth
- natural
- low impact
- total body exercise movement.

An ergonomic exercise trainer that is most similar to human running motion

## Recumbent Bike

*The new Step-Through design allows users to easily get on and off the bike. Whilst the new ergonomic seat provides both comfort and support to suit users of all different heights.*

### STEX S25R Series Recumbent Bike:

- Ergonomic design
- Offers comfort that enables longer use.
- A new handle design can be set to two exercising postures according to a user's preference.
- The saddle adjustment system uses a gas cylinder (standing) and a sliding rack saddle adjustment system with narrow intervals (sitting), which provide comfortable exercise adjusted to the physical conditions of the users.

## Upright Bike

*The S25 series bike brings optimum results through smart exercise.*

### STEX S25U Series Upright Bike:

- Ergonomic design
- Offers comfort that enables longer use.
- A new handle design can be set to three exercising postures according to a user's preference.
- The saddle adjustment system uses a gas cylinder (standing) and a sliding rack saddle adjustment system with narrow intervals (sitting), which provide comfortable exercise adjusted to the physical conditions of the users.
